

Introducing SmartStacks - Hapag-Lloyd's dray-off solution in Savannah

Hapag-Lloyd North America in collaboration with IMC, introduces SmartStacks, a revolutionary data-based cargo handling system that streamlines the shipping process, increases container throughput, enhances cargo security, and optimizes space utilization.

Our Offer

Hapag-Lloyd's collaboration with SmartStacks provides you a customizable, secure, and efficient solution for your cargo shipping needs.

- **When:** No waiting, book today!
- **What:** We handle all Carrier Haulage import truck moves via Savannah, for dry 20/40' non-hazardous containers, complying to legal weight only.
- **How:**
 - **Priority access:** means no delays at the terminal. Your Hapag-Lloyd container will be in SmartStacks peel-pile for easy retrieval by drivers.
 - **Faster, more reliable delivery:** ensures your cargo gets delivered on time. SmartStacks technology triples the number of out-gates at ports and terminals.
 - **Dray-Off Program:** securely stores your container off dock if you are unable to receive the cargo immediately, for a one-time dray-off fee of USD 125/box and USD 80/100 per 20/40' per day. Your detention time only starts after the container leaves the dray-off yard!

Your Benefit

- **Speed to market:** Your cargo is delivered fast and on-time. Receive shipments straight from the terminal to your facility
- **Reduced storage costs:** Take advantage of lower cost off dock storage
- **Reduced dwell times:** No more waiting! - SmartStacks reduce dwell times considerably
- **Reduced environmental impact:** Lower driver idling time reduces fuel costs and carbon emissions.
- **Flexibility:** Your Hapag-Lloyd container can be delivered to IMC's depot at your convenience. If you're not ready to receive it, we can store it there at a lower cost than the terminal and provide better free days incentives for Carrier Haulage moves.
