

River Service

Loire-sur-Rhône – Fos-sur-Mer

A sustainable connection between Loire-sur-Rhône and Fos-sur-Mer

Hapag-Lloyd understands sustainability as one of our core responsibilities. We strive to develop best-in-class Inland products and innovative sustainable solutions moving your cargo door-to-door. That is why in France we combine barge with train services and launch an innovative river service connecting Loire-sur-Rhône and Fos-sur-Mer.

Our Offer

- A weekly barge service connecting Loire-sur-Rhône with Fos-sur-Mer
- An enhanced multi-modal coverage of the départements of Isère, Loire and Rhône-Alpes
- An alternative transport option to the often congested Port of Lyon
- A fixed weekly volume reserved for Hapag-Lloyd customers
- A reliable and more eco-friendly intermodal service

Your Benefits

- Reduce your carbon footprint using barge services, which produce less CO₂ emissions: Each ton moved via barge produces 5 times less CO₂ than road transport
- Benefit from a shorter duration by avoiding congestions and traffic jams on the highways and streets in and around Lyon
- Reduce the risk of delays and additional costs
- Help lowering local noise pollution as transport by barge is the most silent mode of transport

Please note:

- Hapag-Lloyd is exploring partners to offer a fully green alternative transport solution by using only “green” trucks (e.g. those using vegetable oil or other bio fuels)
- Hapag-Lloyd continuously examines all options to use biofuels instead of diesel fuel for barges, in order to reduce CO₂ emissions by 90 %

Schedule

Import from Fos-sur-Mer to	Cut Off	ETA
Lyon	Monday 4pm	Thursday 2pm
Loire-sur-Rhône	Monday 4pm	Friday 10am

Export to Fos-sur-Mer from	Cut Off	Availability of full containers
