

Gemini Cooperation

Reliability. Connectivity. Sustainability.

Welcome on board the Gemini Cooperation. Get ready to set sail with connectivity, reliability and sustainability.

The Gemini Cooperation at a glance for you

Reliability

Industry leading schedule reliability of >90%

- Strong focus within Gemini Cooperation on schedule reliability¹⁾ to increase on-time delivery on box level from today ~50% to >80%
- Efficient mainliner network with (mostly) controlled hubs & owned shuttles will improve reliability and port coverage
- Strategically aligned partners with equal rights will result in faster decision-making, backed by contractual obligations

Connectivity

Excellent network coverage with efficient connections and competitive transit times

- Network centered around hubs that are jointly controlled and managed by Gemini Cooperation partners
- Large and dedicated shuttles run by Gemini Cooperation partners will serve an extensive network, complemented by feeders
- Frequent shuttles in synchronized connections with reliable mainliners will half dwell times and allow cargo to reach the desired destination faster

Sustainability

Accelerate decarbonization efforts

- Absolute GHG emission reduction targets to align with 1.5-degree trajectory
- Reduce absolute emissions over 30% by 2030²⁾ and net-zero by 2045
- Further enhance green product offerings towards our customers
- Levers that will enable decarbonization: effective hub & spoke model, speed optimization, larger ships, strategic terminal hubs, alternative fuels, reduced waiting times

¹⁾ Above 90% once the network is fully phased in after first year of cooperation

²⁾ Absolute fleet-related scope vs. 2022
